

MaaS360 Mobile Device Management

Advances in mobility have enabled businesses to become more productive as the number of employees working remotely increases, yet with this added flexibility, businesses can often feel that there is a loss of control. Now your customers can take control of their business-critical data on their company smartphones and tablets with our Device Management solution. Our solution keeps users connected to their employees and in control of any sensitive information carried on staff mobile devices.

IBM MaaS360® is the fastest and most comprehensive way to configure devices for enterprise access and secure corporate data on smartphones and tablets — all from a single screen. As a fully-integrated cloud platform, MaaS360 simplifies mobile device management (MDM) with rapid deployment, visibility and control that spans across mobile devices, applications and documents.

MaaS360 Mobile Device Management delivers robust management capabilities across all major computing platforms, including iOS, macOS, Android and Windows devices.
