

Managed LAN & WiFi

Allowing a professional organisation such as to manage your LAN and WiFi means you are placing your IT infrastructure in safe hands. With a wealth of experience in managed Network solutions and a 24 / 7 x 365 UK support desk, we are highly skilled and available round the clock to keep your business running.

Why choose a Managed LAN & WiFi service?

Allowing us to design, deploy and manage your LAN and WiFi means that we can work proactively; fixing faults and ensuring that your Network is always running at full capacity and as smoothly as possible. Passing this over to us means that your IT team can focus on developing front-end applications and improving business processes. It also decreases the need for additional recruitment in order to support your team, which in turn decreases business costs. This is what we are experts at - wouldn't you want your infrastructure maintained by the very best? Streamline your internal IT resources, reduce the risk of failures affecting your business and allow us to take the reins.

Why work with us?

Choosing us to manage your LAN and WiFi allows your business to alleviate the stress of managing this internally, and can assist in cost saving too.

With some of the biggest companies in the UK currently taking services from us, you can be sure that your infrastructure is in safe hands and will be supported 24 / 7 x 365 with our team of UK based support technicians.

A single end-to-end SLA further supports the decision to pass control over to savincom, who have uniquely demonstrated the highest levels of compliance with industry standards - having been awarded a total of 5 ISO accreditations.
