

Microsoft Office 365 from Vodafone

Do business virtually
anywhere

 Office 365

What is Microsoft Office 365?

Office 365 from Vodafone gives you all your favourite Microsoft software, like Word, Excel, and PowerPoint, on all your devices that store documents in the cloud when you choose, so you can use them wherever you are.

And with Exchange email, Skype for Business, SharePoint and Online storage, it is more than just your office, it is your full IT solution.

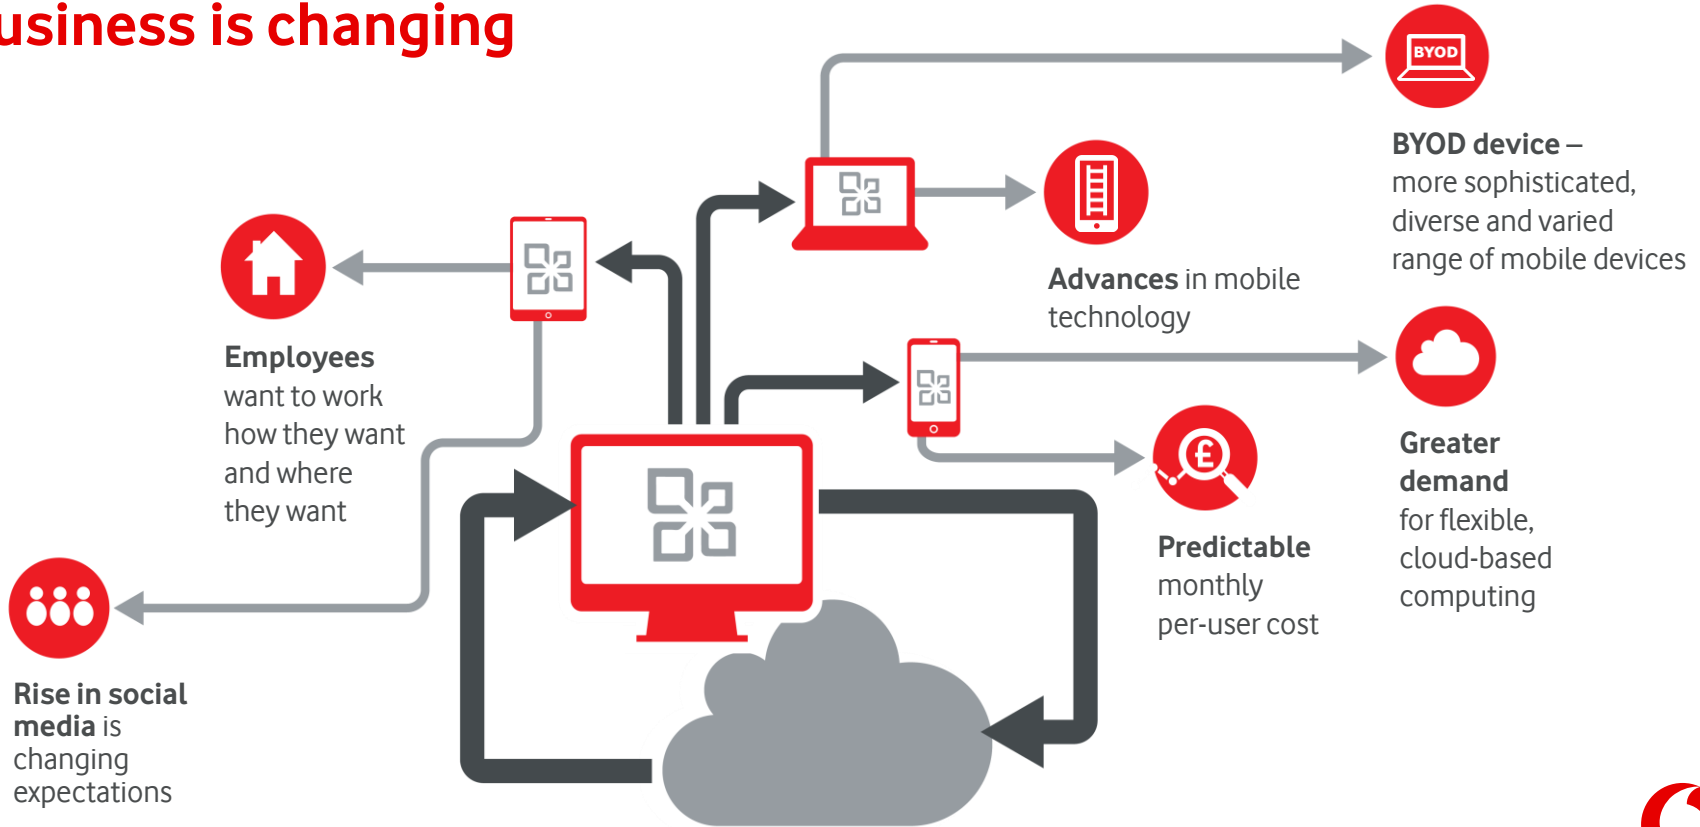

Whatever size of business you are, it enables your employees to work together seamlessly and securely whether they're at home, in the office or on the move. And whether they're using iPhone, Android™, Windows Phone or Blackberry® phones, or a PC, Mac, tablet or laptop.

“This has made a massive impact on our business. It's given us a competitive edge in a crowded marketplace. Our people have far superior tools to do their job, they look slick, professional and flexible in front of our customers.”

Tony Henthorn,
Publishing Director, Diversified
Communications UK

The workplace is evolving and the way we do business is changing

Enterprise communications are becoming **more sophisticated, diverse and increasingly challenging to control**

Increased complexity

Controlling cost of a mobile workforce

Ensuring a consistent experience for all consumers
